

EAST TEXAS BY NATURE

A block of the month quilt

BLOCK 1 GECKO

We will start you with a simple block that has only two templates. As we go along I will give you some tips as the blocks require more work. For the gecko, remember he tries to blend into his environment, so the colors should be similar. Let the texture of the print distinguish the gecko from the leaf. I bought some great beads for the gecko eyes that can be added later.

Remember, the dotted lines represent the placement of the solid line templates in relation to the other elements of the block.
